Re: Docket Numbers 12-353 and 13-5

I am submitting my comment on AT&T's Proposal for Service Based Technology Transitions Experiments before the Federal Communications Commission to convert landline phone services in the West Marin region of California to wireless services. I do not want to lose my landline phone service because it provides backup in case cell phone service goes down. West Marin is a rural area and communication is vital. Cell phone service is spotty and unreliable in our area. Additionally, I do not want to be exposed to unnecessary wireless radiation. I choose to use my landline phone as my primary means of phone communication. I urge the FCC to reject AT&T's proposal.

Sincerely, Patricia Thomas Pt. Reyes Station, CA
